

## HIGH-PERFORMING DATA-CENTRIC STACK FOR BIG DATA APPLICATIONS AND OPERATIONS

BigDataStack is a unique high-powered stack of solutions with a focus on providing fully efficient and optimised processes across the complete set of technologies required by data operations and data-intensive applications.

### KEY RESULTS

**Data-driven infrastructure management system** for infrastructure providers

**Data as a Service** for data providers, decision makers, private and public organisations

**Data toolkit** for data scientists and practitioners

**Process modelling and optimization framework** for business analysts

**Application dimensioning workbench** for application providers and engineers

Yosef Moatti, project coordinator (IBM Haifa):

*"BigDataStack delivers an innovative stack, with a data driven infrastructure management system. BigDataStack aims at being fully scalable, runtime adaptable and high-performant and thus is well positioned to address the needs of big data operations and data-intensive applications."*

# USE CASES

## Connected consumer

Consumer-tailored predictions and personalized offers in real time

## Real-time ship management

Predictive maintenance and spare parts inventory management towards dynamic routing

## Smart Insurance

Profitability prediction, personalized recommendation to customers with cross- and up-selling strategies and churn prediction

## BigDataStack Features

- ≡ A new and distributed architecture
- ≡ Data operations characterisation and application analysis
- ≡ Data-driven & runtime adaptable decisions
- ≡ Covers the complete data path and lifecycle
- ≡ Visualization of information for the infrastructure and data analytics results
- ≡ Availability and integration

## Stakeholders

Big data organizations & initiatives

Standardisation bodies

Academia and research

Entrepreneurs, ICT SMEs & Start-ups

Open Source Project and Initiatives

General public

## Who's behind BigDataStack?

Balanced mix headed by IBM Israel (IL) involving large industrial players, research centres and SMEs: Athens Technology Center (GR), ATOS (ES), Danaos Shipping Co. (CY), GFT Italia (IT), LeanXcale (ES), NEC Europe (UK), Red Hat Israel (IL), SingularLogic (RO), Trust-IT Services (UK), Ubitech (CY), Universidad Politecnica de Madrid (ES), University of Glasgow (UK), University of Piraeus Research Center (GR).
